AtliQ Hospitality Analysis

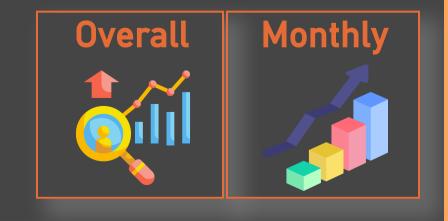

Problem Statement:

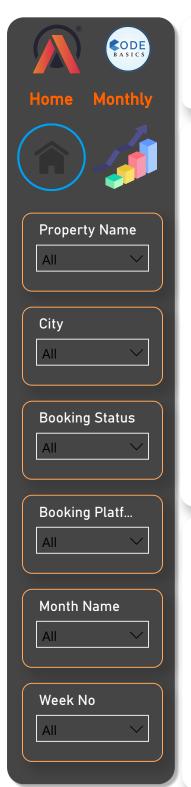

AtliQ Grands, a chain of five-star hotels in India, is experiencing a decline in market share and revenue due to competitive pressures and ineffective management decisions. To counteract this, they aim to leverage Business and Data Intelligence but lack an in-house analytics team. Consequently, they have decided to hire a third-party service provider to analyze their booking data from the past three months and deliver insights that will help them regain market share and boost revenue.

End Goal:

The project's goal is to analyze the three months of booking data from AtliQ Grands hotels and provide actionable insights and strategic recommendations. These insights will be aimed at helping the company reclaim market share and enhance revenue in the luxury and business hotel segment.
